

Dongfang Zhao, Ph.D.

Nationality: United States of America

Education

University of Washington, Seattle	Computer Science, PostDoc	2017
Illinois Institute of Technology, Chicago	Computer Science, PhD	2015
Emory University, Atlanta, GA	Computer Science, MS	2008

Employment

2023–now	University of Washington (UW) ◦ Assistant Professor, School of Engineering & Technology, UW Tacoma ◦ Adjunct Professor, Allen School of Computer Science & Engineering, UW Seattle ◦ Affiliate Faculty of Data Science, eScience Institute, UW Seattle
2018–2023	Affiliate Faculty, University of California, Davis
2018–2023	Assistant Professor, University of Nevada, Reno (UNR)
2015	Research Intern, IBM Almaden Research Center, San Jose, CA
2014	Research Intern, Argonne National Laboratory, Chicago, IL
2013	Research Intern, Pacific Northwest National Laboratory, Seattle, WA
2009–2011	Software Developer (full-time), Epic Systems Corporation, Madison, WI

Awards

2022	Federal Research Grant, UNR PI, NSF 2112345, \$255,916 “A DLT Machine Learning Platform for Blockchain Warehousing”
2020	Federal Research Grant, UNR PI, DOE SC0020455, \$200,000 “HPChain: Energy-Efficient Scalable Blockchains for HPC Systems”
2019	Best Paper Award, International Conference on Cloud Computing “BlockLite: Toward Accurate and Efficient Emulation of Public Blockchains in the Cloud”
2018	Best Student Paper Award, IEEE International Conference on Cloud Computing “Toward Cost-Effective Memory Scaling in Clouds: Symbiosis of Virtual and Physical Memory”

Professional Services

2018–now	Associate Editor, Journal of Big Data (Springer)
2021–now	Review Editorial Board, IEEE Transactions on Parallel and Distributed Systems (TPDS)
2025–now	Senior PC Member, AAAI Conference on Artificial Intelligence (AAAI)

Recent Projects

AdaDisk	Distributed agentic system for adaptive ingestion-query scheduling of DiskANN in LLM serving: https://github.com/hpdic/AdaDisk Tags: large language models, AI agents, high-performance computing, C++, Python
Hermes	MySQL plug-in for high-performance homomorphic encryption of vector databases in RAG: https://github.com/hpdic/Hermes Tags: retrieval-augmented generation, vector databases, homomorphic encryption, C++

Selected Publications (Dongfang Zhao was/is the *student's academic advisor)
