

# Dongfang Zhao, Ph.D.

Citizenship: United States

Position: Assistant Professor, University of Nevada, Reno

## Professional Preparation

|                                  |             |                  |         |      |
|----------------------------------|-------------|------------------|---------|------|
| Emory University                 | Atlanta, GA | Computer Science | MS      | 2008 |
| Illinois Institute of Technology | Chicago, IL | Computer Science | PhD     | 2015 |
| University of Washington         | Seattle, WA | Computer Science | PostDoc | 2017 |

## Employment

|              |                                                                         |
|--------------|-------------------------------------------------------------------------|
| 2018–present | Assistant Professor of Computer Science, University of Nevada, Reno     |
| 2018–2020    | Visiting Professor of Computer Science, University of California, Davis |
| 2015         | Research Intern, IBM Almaden Research Center, San Jose, CA              |
| 2014         | Research Intern, Argonne National Laboratory, Chicago, IL               |
| 2013         | Research Intern, Pacific Northwest National Laboratory, Seattle, WA     |

## Awards and Grants

|      |                                                                                                                                                                          |
|------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2022 | Federal Research Grant, NSF 2112345, \$255,916, PI at University of Nevada (50% share)<br>“A DLT Machine Learning Platform for Blockchain Warehousing”                   |
| 2020 | Federal Research Grant, DOE SC0020455, \$200,000, PI at University of Nevada (50% share)<br>“HPChain: Energy-Efficient Scalable Blockchains for HPC Systems”             |
| 2019 | Best Paper Award, International Conference on Cloud Computing<br>“BlockLite: Toward Accurate and Efficient Emulation of Public Blockchains in the Cloud”                 |
| 2019 | Industrial Research Grant, Amazon Web Services, \$30,000                                                                                                                 |
| 2019 | Industrial Research Grant, Google Cloud Platform, \$15,000                                                                                                               |
| 2018 | Best Student Paper Award, IEEE International Conference on Cloud Computing<br>“Toward Cost-Effective Memory Scaling in Clouds: Symbiosis of Virtual and Physical Memory” |
| 2017 | Industrial Research Grant, Microsoft Azure, \$20,000                                                                                                                     |
| 2017 | Industrial Research Grant, Amazon Web Services, \$10,000                                                                                                                 |

## Services

|              |                      |                                                     |
|--------------|----------------------|-----------------------------------------------------|
| 2021–present | Review Board         | IEEE Transactions on Distributed & Parallel Systems |
| 2023         | Program Committee    | AAAI-23                                             |
| 2022         | Grant Review Panel   | National Science Foundation: CISE OAC               |
| 2022         | Grant Review Panel   | National Science Foundation: CISE IIS               |
| 2019         | Organizing Committee | ACM/IFIP International Middleware Conference        |
| 2018         | Grant Review Panel   | U.S. Department of Energy: ASCR                     |
| 2018         | Grant Review Panel   | National Science Foundation: CISE IIS               |

## Teaching

|                                         |                            |              |
|-----------------------------------------|----------------------------|--------------|
| CS 705: Cryptography and Blockchain     | University of Nevada, Reno | 2022–present |
| CS 791: Distributed Computing           | University of Nevada, Reno | 2020–present |
| CS 457/657: Database Management Systems | University of Nevada, Reno | 2018–present |
