

Dongfang Zhao, Ph.D.

Nationality: United States of America

Education

University of Washington (UW), Seattle	Computer Science, PostDoc	2017
Illinois Institute of Technology, Chicago	Computer Science, PhD	2015
Emory University, Atlanta, GA	Computer Science, MS	2008
Katholieke Universiteit Leuven, Belgium	Statistics, Diploma	2005

Employment

2025–now	Adjunct Assistant Professor, UW Paul G. Allen School of Computer Science & Engineering
2023–now	Tenure-Track Assistant Professor, UW Tacoma School of Engineering & Technology
2018–2023	Affiliate Faculty, University of California, Davis
2018–2023	Assistant Professor, University of Nevada, Reno
2015	Research Intern, IBM Almaden Research Center, San Jose, CA
2014	Research Intern, Argonne National Laboratory, Chicago, IL
2013	Research Intern, Pacific Northwest National Laboratory, Seattle, WA
2009–2011	Software Developer (full-time), Epic Systems Corporation, Madison, WI

Awards

2022	Federal Government Research Grant, NSF 2112345, \$255,916 “A DLT Machine Learning Platform for Blockchain Warehousing”
2020	Federal Government Research Grant, DOE SC0020455, \$200,000 “HPChain: Energy-Efficient Scalable Blockchains for HPC Systems”
2019	Best Paper Award, International Conference on Cloud Computing “BlockLite: Toward Accurate and Efficient Emulation of Public Blockchains in the Cloud”
2018	Best Student Paper Award, IEEE International Conference on Cloud Computing “Toward Cost-Effective Memory Scaling in Clouds: Symbiosis of Virtual and Physical Memory”

Recent Projects

[BadRSSD]	Information-theoretical backdoor attacks on diffusion models utilizing residual score subspace dispersive loss: https://github.com/hpdic/BadRSSD (private for now) <i>Tags:</i> Generative AI security, Latent subspace learning, Fine-tuning integrity, PyTorch
[ElasticIVF]	Elastic in-memory vector indexing and search for streaming data analysis on heterogeneous distributed platforms: https://github.com/hpdic/ElasticIVF <i>Tags:</i> Distributed GPU computing, Message passing interface (MPI), Faiss, C++, Python
[AdaDisk]	Decentralized agentic systems for adaptive ingestion-query scheduling of disk-resident vector indices in LLM serving: https://github.com/hpdic/AdaDisk <i>Tags:</i> Large language models, AI agents, Distributed systems, DiskANN, C++, Python
[Hermes]	MySQL plug-in for high-performance homomorphic encryption of vector databases in privacy-preserving RAG: https://github.com/hpdic/Hermes <i>Tags:</i> Retrieval-augmented generation, Fully homomorphic encryption, OpenFHE, C++

Selected Publications (Dongfang Zhao was/is the *student's academic advisor)
