

Dongfang Zhao, Ph.D.

Nationality: United States of America (naturalized in Sacramento, California)

Education

University of Washington (UW), Seattle	Computer Science, PostDoc	2017
Illinois Institute of Technology, Chicago	Computer Science, PhD	2015
Emory University, Atlanta, Georgia	Computer Science, MS	2008
Katholieke Universiteit Leuven, Belgium	Statistics, Diploma	2005

Professional Experience

2026–now	Open-source Contributor, Meta/Facebook Faiss (CUDA kernel)
2025–now	Open-source Contributor, Microsoft DiskANN (C++ main branch)
2023–now	Assistant Professor, UW Tacoma School of Engineering & Technology
2023–now	Affiliate Faculty, UW eScience Institute
2018–2023	Visiting Professor, University of California, Davis
2018–2023	Assistant Professor, University of Nevada, Reno (UNR)
2015–2015	Research Intern, IBM Almaden Research Center, San Jose, CA
2014–2014	Research Intern, Argonne National Laboratory, Chicago, IL
2013–2013	Research Intern, Pacific Northwest National Laboratory, Seattle, WA
2009–2011	Software Developer (full-time), Epic Systems Corporation, Madison, WI

Selected Awards

2022	Federal Government Grant, UNR PI, NSF 2112345, \$255,916 “A DLT Machine Learning Platform for Blockchain Warehousing”
2020	Federal Government Grant, UNR PI, DOE SC0020455, \$200,000 “HPChain: Energy-Efficient Scalable Blockchains for HPC Systems”
2019	Best Paper Award, International Conference on Cloud Computing “BlockLite: Toward Accurate and Efficient Emulation of Public Blockchains in the Cloud”
2018	Best Student Paper Award, IEEE International Conference on Cloud Computing “Toward Cost-Effective Memory Scaling in Clouds: Symbiosis of Virtual and Physical Memory”
2016	Postdoctoral Fellowship, Sloan Foundation, \$155,000
2007	Graduate Fellowship, Oak Ridge Institute for Science and Education, \$85,000

Recent Projects

[EGA]	Euclidean geodesic alignment for self-limiting adapters of frozen encoders perserving out-of-distribution geometry in vector search: https://github.com/hpdc/EGA Tags: Representation learning, Parameter-efficient fine-tuning (PEFT), SigLIP, DINOv2
[ElasticIVF]	Elastic in-memory vector indexing and search for streaming data analysis on heterogeneous distributed platforms: https://github.com/hpdc/ElasticIVF Tags: Distributed GPU computing, Message passing interface (MPI), Faiss, CUDA kernel
[AdaDisk]	Decentralized agentic systems for adaptive ingestion-query scheduling of disk-resident vector indices in LLM serving: https://github.com/hpdc/AdaDisk Tags: Large language models, AI agents, Distributed systems, DiskANN, C++, Python

Selected Publications (Dongfang Zhao was/is the *student's academic advisor)

- [1] *Han Zhang, **Dongfang Zhao**. RAE: A Neural Network Dimensionality Reduction Method for Nearest Neighbors Preservation in Vector Search. The 32nd ACM SIGKDD Conference on Knowledge Discovery and Data Mining (KDD), 2026.
- [2] **Dongfang Zhao**. SIVF: GPU-Resident IVF Index for Streaming Vector Analytics. The 35th ACM International Symposium on High-Performance Parallel and Distributed Computing (HPDC), 2026.
- [3] *Jiuzhou Fu, **Dongfang Zhao**. QPAD: Quantile-Preserving Approximate Dimension Reduction for Nearest Neighbors Preservation in High-Dimensional Vector Search. The 42nd IEEE International Conference on Data Engineering (ICDE), 2026.
- [4] *Jiayao Wang, ..., **Dongfang Zhao**. BadRSSD: Backdoor Attacks on Regularized Self-Supervised Diffusion Models. The IEEE Conference on Computer Vision and Pattern Recognition (CVPR) Findings, 2026.
- [5] *Baigang Chen, **Dongfang Zhao**. Reliable Non-Leveled Homomorphic Encryption for Web Services. The ACM Web Conference (formerly International World Wide Web Conference, or WWW), 2026.
