

# Dongfang Zhao, Ph.D.

Nationality: United States of America

## Education

|                                           |                           |      |
|-------------------------------------------|---------------------------|------|
| University of Washington, Seattle         | Computer Science, PostDoc | 2017 |
| Illinois Institute of Technology, Chicago | Computer Science, PhD     | 2015 |
| Emory University, Atlanta, GA             | Computer Science, MS      | 2008 |

## Employment

|           |                                                                                                                                                                                                                                                                                                                           |
|-----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2023–now  | University of Washington (UW) <ul style="list-style-type: none"><li>◦ Tenure-track Assistant Professor, UW Tacoma School of Engineering &amp; Technology</li><li>◦ Adjunct Assistant Professor, Paul G. Allen School of Computer Science &amp; Engineering</li><li>◦ Data Science Affiliate, eScience Institute</li></ul> |
| 2018–2023 | Assistant Professor, University of Nevada, Reno                                                                                                                                                                                                                                                                           |
| 2015      | Research Intern, IBM Almaden Research Center, San Jose, CA                                                                                                                                                                                                                                                                |
| 2014      | Research Intern, Argonne National Laboratory, Chicago, IL                                                                                                                                                                                                                                                                 |
| 2013      | Research Intern, Pacific Northwest National Laboratory, Seattle, WA                                                                                                                                                                                                                                                       |
| 2009–2011 | Software Developer (full-time), Epic Systems Corporation, Madison, WI                                                                                                                                                                                                                                                     |

## Awards

|      |                                                                                                                                                                          |
|------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2022 | Federal Government Research Grant, NSF 2112345, \$255,916<br>“A DLT Machine Learning Platform for Blockchain Warehousing”                                                |
| 2020 | Federal Government Research Grant, DOE SC0020455, \$200,000<br>“HPChain: Energy-Efficient Scalable Blockchains for HPC Systems”                                          |
| 2019 | Best Paper Award, International Conference on Cloud Computing<br>“BlockLite: Toward Accurate and Efficient Emulation of Public Blockchains in the Cloud”                 |
| 2018 | Best Student Paper Award, IEEE International Conference on Cloud Computing<br>“Toward Cost-Effective Memory Scaling in Clouds: Symbiosis of Virtual and Physical Memory” |

## Recent Projects

|                     |                                                                                                                                                                                                                                                                                                       |
